

BURAK HAŞICI

SOFTWARE ENGINEER

+90 535 368 55 17 | burakhasici@gmail.com | [LinkedIn](#) | [Github](#) | [Website](#)

Location: Istanbul/Turkey

SUMMARY

Software engineer with hands-on work across frontend and backend technologies including React, Next.js, Node.js, ExpressJS, NestJS, and React Native, creating fast and reliable user experiences. Skilled in TypeScript, state management with Redux, React Query, and Zustand, and day-to-day use of AI tools such as Cursor and Claude Code. I focus on clean structure, reusable components, and accessibility from the start. I've supported product teams in finance, media, and tech by improving load times, reducing bugs, and aligning UI with business goals.

TECHNICAL SKILLS

Programming Languages: TypeScript, JavaScript, Swift, Dart, C, Java, Python
Frameworks & Libraries: React, Next.js, React Native, Node.js, ExpressJS, NestJS, Expo, Svelte, SwiftUI
AI Tools & Utilities: Claude Code, Cursor, Antigravity (Gemini), OpenAI Codex
State Management & Data Handling: Redux, Redux Toolkit, Redux Thunk, Zustand, React Query (Tanstack), GraphQL
Testing: Vitest, Jest, React Testing Library
Databases: SQL (PostgreSQL), MongoDB
Tools & DevOps: Git, GitHub, Bitbucket, VSCode, Cursor, Xcode, Vercel
Design & Collaboration: Figma, Sketch, Miro, Confluence, Jira, Slack, Microsoft Teams, Microsoft Office, Agile Software Development, Scrum

PROFESSIONAL EXPERIENCE

HqO (contracted By ElephantApps)

Dec 25 - Present

Software Engineer (AI Native)

This role is provided by Elephantapps with full time contracted role. During my role:

- Developed full-stack applications with React, Next.js, Node.js, and NestJS on HqO's and Leesman's platforms.
- Worked in the events domain, delivering features used by both tenants and landlords.
- Took part in the product migration of the Leesman software into the HqO application.
- Supported the existing Leesman platform by developing new features in response to customer requests.
- Built AI-powered applications that automated internal workflows for the Leesman team, cutting tasks that previously took 4–7 hours down to 5 minutes.
- Used AI tooling such as Cursor and Claude Code extensively throughout day-to-day development.
- Collaborated across time zones with customers and fellow developers based in the UK, Slovakia, Poland, and the US.

NONPUBLIC

May 25 - Nov 25

Frontend Developer

- Contributed to the development of customer-facing and back-office applications in collaboration with a globally distributed team (HQ in Sydney, Australia).
- Built and maintained web and mobile applications, including onboarding flows, using React, React Native, TypeScript, React Query, and SASS, with Figma for UI design.
- Developed an investor-focused mobile application with React Native.
- Partnered with the marketing team to deliver a high-performance company website (achieved 100 performance score in Lighthouse) using Next.js, TypeScript, SASS, and Sanity CMS.

FIBABANKA (via Veriport)

Jul 24 - May 25

Frontend Developer

- Transformed core banking applications originally developed in Java/XML, used across all branches for accounting, customer services, and EFT, by implementing React, Redux, and a customized version of Material UI.
- Analyzed legacy screens built with XML and Java on the backend and documented findings in Confluence.
- Improved UI performance by up to two times in certain areas compared to the XML-based applications.
- Developed custom UI components for the company’s UI library, documented them with Storybook, and used JSDoc for component documentation.

ELEPHANTAPPS (contracted to LEESMAN)

Dec 2022 - Jun 2024

Frontend Developer

- Developed custom web applications using React and Next.js.
- Optimized React applications, achieving up to 80% performance improvements.
- Managed and resolved client requests via Jira.
- Built scalable solutions using Redux, Styled Components, Axios, and Redux Thunk.
- Collaborated with UK-based international clients, ensuring timely delivery of features.
- Documented workflows and applications using Jira and Confluence.

Digiturk / Bein Media Group

Feb 2022 - Dec 2022

Frontend Developer

- Addressed and resolved Jira requests from call center teams.
- Developed web applications for in-house R&D projects using React.
- Utilized a modern tech stack including Redux (state management), Redux Saga (middleware), Axios (API fetching), Bootstrap, Styled Components, and Emotion for UI development.

EDUCATION

Bahcesehir University

Feb 2024 - Jun 2025

Marketing Master Degree

Istanbul Kultur University

Sep 2016 - Mar 2022

Industrial Engineering
